Abstract of DE3811737

The push-button arrangement (1) consists of a flexible membrane element (2) having at least one integrally formed key (3) with a contact (5), which element is joined to a second, rigid element (7) whose contacts (8) are closed by those of the key (3). The two elements (2, 7) are joined by means of spacers (4) which are integrally formed on the membrane element (2).
